BRING THE BEST OF NATURE INDOORS

Mother Nature is a great painter and our natural environment has inspired so many of Resene's most popular colours.

Next time you're out for a walk, pay attention to the colours around you, the colour combinations and the variety of tones. Nature is never just one colour, so why choose just one for your decorating? Build in tone-on-tone and layer multiple shades of the same and complementary Resene colours to reflect the subtle nuances of our natural world. Try a Resene FX Paint Effect to add a sheer wash of colour.

Consider finish and the way light interacts with the colour and finish used. Glossy paints like Resene Enamacryl will reflect more light, while flatter paints, like Resene SpaceCote Flat will give you a softer, diffused finish.

If you're finding it hard to choose colours, use the Resene Colour Palette Generator (resene.com/palettegenerator) to turn your photo of your favourite landscape into a custom Resene colour palette for you. Or book a Resene Colour Consultation, (resene.com/colourconsult), for tailored advice from a Resene Colour Expert.

PAPER IT PRETTY

Designs from the Resene Wallpaper Collection include a wide range of botanical prints that take inspiration from grand English gardens,

ornithological patterns, Japanese-style botanicals and tropical palm tree prints. A visit to your local Resene ColorShop will allow you to find the right nature-inspired wallpaper for your space.

WOOD IS GOOD

Wooden floorboards and furniture go well with a nature-inspired interior. Native timbers are fantastic but you can paint or finish any wood to create the look you require.

Resene Colorwood wood stain enhances the natural beauty of timber and lets the grain of timber show through. They also protect the timber when paired with Resene Crystal ClearFloor for flooring and Resene Aquaclear on walls and furniture.

Like nature itself, nature-inspired spaces can continue to grow and evolve over time so consider adding seasonal elements of nature too – this might be the cheerful colour of spring flowers, pine cones or found objects like driftwood or shells.
