

# THE COLOURS OF AUTUMN GREY

Whether you like your greys straight or with subtle undertones, there's no doubt that grey is a go-to colour for homes inside and out.

## SHADES OF THE SEASON

Grey is such a universal colour that you can easily dress it up to suit any season or style. Add a pop of fresh greens and yellows for spring time, terracotta accessories for autumn and touches of rich red for winter. While you may be tempted to play it safe by opting for one grey, make sure you create enough visual interest for the eyes. For a tonal colour palette choose a range of greys from dark through to light, such as Resene Fuscous Grey in full, half and quarter strength or add a trio of accents in a bolder colour to lift a grey colour palette. If you find straight grey is too cool, look to greige, which sits comfortably between greys and browns and is fabulous trimmed with the greatest neutral of all - white. In this room tone-on-tone grey with Resene Quarter Bokara Grey on the walls and Resene Eighth Bokara Grey on the floor are given a luxe touch with the bedhead and side table in Resene Virtuoso.
