

FRESH LIVING

With its strong ties to nature, relaxation and wellness, green seems the very embodiment of life. We're looking to inject fresh vibrancy, positivity and energy into our home interiors – and feel-good colour palettes are an easy way to accomplish this.

RESENE
Clover

Lush greens like Resene Clover, Resene Dingley and Resene Green Leaf are a fitting match for zesty citrus tones like bitter orange or lemon-lime, such as Resene Smoke Tree and Resene Chenin. Just a touch of these sharply acidic notes can go a long way when supported by a base built on grassy greens like Resene Clover, creamy yellowed whites like Resene Rice Cake and warm brown wood tones like Resene Colorwood Natural. Bring in a touch of powder pink like Resene Paper Doll and you'll have what we expect will become one of the most of-the-moment colour palettes for trend lovers.

While there are many ways to achieve a citrusy colour scheme, one idea is to team it up with another hot trend: cottagecore design. Although it's a trend, it embraces an 'anti-trend' approach that invites you to choose what you love and create rooms filled with colours to reflect your personal style, in a way that is uplifting every time you enter.
