

**SOME OF OUR FAVOURITE
BEDROOM HUES TO TRY**

BEDROOM BLISS

Bedrooms are by their very nature personal spaces, so how we decorate them is also highly personal. If you have a thing for purple, want bold daisy patterns on your walls or want to replicate the inside of Versailles in your room – who’s to say you can’t?

There’s lots you can do to transform your bedroom space. This can be achieved in many ways through Resene paint colours, wallpapers and accessories, and by using a soothing theme – think coastal, tropical or mindful. There’s a trend towards being very indulgent with our bedrooms, mimicking a resort-style luxe feel that makes us feel pampered and restored.

Earthy tones ground us, and blush pinks are great for creating calming, womb-like spaces. Blues are washing through our bedrooms and greens are flourishing. Soft whites and neutrals allow us to change up the bed linen, and misty greys give a restful backdrop. If you’re going bold with Resene paint or wallpaper, add your colour feature on the bedhead wall so that you see your favourite shade when you enter the room but it won’t keep you awake. If you’re opting for a more

soothing hue, consider continuing your Resene paint colour onto the ceiling for a cosy cocoon of colour.

Use the bed linen, an artwork, window fabrics or a rug as a starting point for choosing your colours. Study the types of colour that appear in these items and use one or more to inspire your Resene paint colours for your walls. Try the handy Resene Colour Palette Generator at resene.co.nz/palettegenerator – simply upload a favourite photograph or image of an artwork, fabric or wallpaper and the generator will suggest a Resene paint colour palette for you.

For more decorating ideas and inspiration for your bedroom, pick up a free copy of the *habitat plus – bedrooms* book at your local Resene ColorShop or book a Resene colour consultation at resene.co.nz/colourconsult.
