Resene AquaShield

mineral effect

		
Untinted Product	Sea Fog	Joanna
		
Parchment	Bison Hide	White Rock
		
Travertine	Double Spanish White	Colonial White
		
Rum Swizzle	Linen	Pearl Bush
		
Tower Grey	Loblolly	Green Spring
		
Kangaroo	Casper	Silver Chalice

Resene AquaShield

mineral effect

Resene AquaShield is a high mineral content super-hydrophobic, water repellent coating for application on most porous building materials to impart watershedding properties. Available in a range of white and light earth colours, Resene AquaShield dries to an attractive mineral flat finish. Colours will lighten with exposure resulting in a natural weathered appearance.

Resene AquaShield combines the water-repellent properties of silicones with a special surface micro-structure considerably reducing the contact area for water and dirt. The result: dirt particles adhere only loosely and are more easily carried away by raindrops, leaving a dry and attractive façade. Ideal for highly stressed weather-exposed facades.

Specifying Resene AquaShield is easy with the Resene One-Line Specification system:

Substrate	One-Line Spec Number	Surface Prep	First Coat	Second Coat	Third Coat
Cementitious Surfaces	20e 1.5	D83	Aquapel D65	AquaShield D601	AquaShield D601

This chart shows only a small selection of the colours that are available in Resene AquaShield. Please contact a Resene Sales Staff member to check the availability of your desired colour.
