

Keep clean

Protect wet areas with the Resene Kitchen & Bathroom range of products.

The Resene Kitchen & Bathroom range combines the durability and easy cleanability of a waterborne enamel with added anti-bacterial silver protection and the mould protection of MoulDefender to minimise bacteria and mould growth. Anti-bacterial silver is internationally recognised as a safe and healthy method of deodorising and sanitising surfaces that come in contact with skin, food and water.

Use Resene SpaceCote Low Sheen Kitchen & Bathroom on walls, Resene Lustacryl Kitchen & Bathroom on trim and joinery, and Resene SpaceCote Flat Kitchen & Bathroom on ceilings. Or for a semi-gloss sheen throughout use Resene Lustacryl Kitchen & Bathroom for walls, trim and joinery.

Over 600,000 kiwis and millions of Australians are affected by asthma so even if you don't suffer from asthma, chances are you know someone who does. Sensitive Choice® is an initiative of the National Asthma Council to help those with asthma and allergy sufferers make better lifestyle choices. The Resene Kitchen & Bathroom range formulated with MoulDefender is Sensitive Choice® approved recognising the extra protection built into each paint.

The Resene Kitchen & Bathroom range is available from Resene ColorShops and resellers in a wide range of over 800 Resene colours suitable for residential and commercial work.

Seal without the solvents

Looking for an interior broadwall sealer that can stand up to wet areas without the strong solvent odours associated with traditional solventborne products?

Resene Waterborne Sureseal is a pigmented penetrating sealer designed to ready a wide range of interior surfaces for topcoating, including old varnishes and Lockwood® finishes. It's suitable for areas throughout your home, even in wet areas such as kitchens, bathrooms and laundries. **Resene Waterborne Sureseal** is easy to apply with excellent adhesion reducing the bleeding of water stains to help your finish look good for longer. Its waterbased formula means you get a low VOC and low odour finish and you can quickly and easily wash up your brush and roller in water once you've finished painting.

Use **Resene Waterborne Sureseal** to ready surfaces for topcoating, such as baked enamels, glass/ceramics, fibre cement, glazed surfaces, plasterboard in wet areas, solid plaster, tiles and varnished surfaces. Generally one coat is all you need. Where superior barrier protection/stain resistance is required, apply a second coat before applying your chosen Resene topcoats to finish.

If you're planning a wallpapering project, use **Resene Waterborne Sureseal** to seal plasterboard ready for wallpapering.
